

Infertility Treatment Packages

Diagnostic Package:

Suitable for:

Couples with unexplained infertility.

Services included:

- Consultation with an infertility specialist
- Consultation with a urologist
- Transvaginal ultrasound
- Routine pre-procedure laboratory tests prior to oocyte pick-up and embryo transfer, and complete male fertility evaluation (including DFI, semen analysis, etc.)
- Pap smear with pathology report
- Uterine cavity depth measurement
- Genetic counseling if indicated

Duration:

If the couple meets the necessary conditions, this package will be completed within 3–2 days.

Package price: 500 USD

Optional Services (upon request):

- Hysterosalpingography (HSG): 90 USD
- Medications: 100 USD
- Transfer and interpreter coordination services
- Fertility nutrition and lifestyle counseling
- English medical report for treatment continuation in home country

Advantages of the Package for International Patients:

- Comprehensive and fast evaluation in the shortest possible time
- Designed for international patients with limited time
- Avoidance of scattered and repetitive testing
- Rapid preparation for initiating the treatment process

In vitro fertilization (IVF) packages

Suitable for: Couples experiencing infertility due to various causes. The Basic IVF Package is preferably recommended for women under 35 years of age and is performed using advanced equipment and an expert medical team.

Services included:

- Consultation with urologist
- Consultation with an infertility specialist
- Anesthesia consultation
- Uterine cavity depth measurement
- Pap smear with pathology assessment
- Genetic counseling (if required)
- Initial examination, hormonal tests, and semen analysis
- Clinical examination and determination of treatment protocol
- Transvaginal ultrasound
- Ovarian stimulation and monitoring
- Oocyte retrieval
- Intra-cytoplasmic sperm injection (ICSI)
- Embryo culture until day 3 or day 5
- One embryo transfer procedure and two pregnancy tests after embryo transfer
- Cryopreservation of 4 embryos (if extra embryos are available)
- Embryo storage of extra embryos for one year
- Final pregnancy test

Special services for international patients:

- Dedicated VIP rooms
- Fast-track and VIP admission
- Provision of treatment reports in English
- Laser-assisted hatching for up to 4 embryos

Package price: 2900 USD

Additional Optional Services (upon request):

- Blastocyst culture for up to 4 embryos: 50 USD
- Hysterosalpingography (HSG): 90 USD
- Medications: 650 USD
- Transfer and interpreter services (upon prior arrangement)
- Nutrition and fertility lifestyle counseling
- Medical report in English for continuation of treatment in the home country

Advantages of the Package for International Patients:

- Completion of the entire process in a short period with precision and organization
- Cost and time savings by receiving all services in one center
- No need for multiple scattered visits
- Access to an expert medical team and advanced equipment
- Comprehensive support throughout the entire stay in Iran

Advanced ICSI Package with PGD

Suitable for:

women over 35 years old or special cases

Services included:

- All steps of the basic IVF package
- Embryo culture extended to blastocyst stage (day 5) to increase success rates
- Embryo biopsy for genetic testing (PGD, PGT-A)
- Transfer of only genetically healthy embryos to reduce the risk of miscarriage or failed pregnancy
- Cryopreservation and storage of surplus embryos for future transfer
- Free storage of frozen embryos for up to one year

Package Price: 3300 USD

Additional Optional Services (upon request):

- Hysterosalpingography (HSG): 90 USD
- Medications: 650 USD
- Transfer and interpreter services (upon prior arrangement)
- Nutrition and fertility lifestyle counseling
- Medical report in English for continuation of treatment in the home country

Advantages of the Package for International Patients:

- performing IVF with the highest quality standards and advanced equipment
- Reduced risk of unsuccessful pregnancy and genetic disorders
- Increased chance of successful pregnancy and the birth of a healthy baby
- Streamlined process completed within a short time with minimal concerns about stay and accommodation

Guaranteed (Three-cycle) ICSI Package

Three-Cycle IVF Program with Refund in Case of Unsuccessful Outcome

Services included:

Up to 3 complete IVF cycles including:

- Hysteroscopy
- Specialist consultation and initial evaluation
- Complete hormonal tests for couples
- Advanced ovarian stimulation medications
- Oocyte retrieval and fertilization (ICSI)
- Embryo transfer (fresh or frozen)
- Luteal phase support medications
- Cryopreservation and storage of surplus embryos
- Psychological and nutritional support throughout the cycles
- Genetic counseling (if required)
- Beta-hCG pregnancy tests in each cycle

Package Price: 9000 USD

Refund Policy:

If, after three complete attempts, no clinical pregnancy is achieved (defined as the detection of a gestational sac on ultrasound), 85% of the paid amount will be refunded.

Eligibility Criteria for Enrollment (to ensure risk management and success):

Criterion	Description
Female age	39–20 years
Body Mass Index (BMI)	Less than 30
Ovarian reserve	AMH \geq 1.0 ng/ml
Medical history	No severe fibroids, uterine abnormalities, or recurrent IVF failures
Smoking	No heavy smoking, or cessation for at least 3 months prior to treatment

Advantages of the Package for International Patients:

- Peace of mind for couples throughout the treatment process
- Reduced financial risk and stress associated with treatment failure
- Access to an expert medical team and advanced equipment
- Suitable for international patients with short-term stays, offering streamlined and well-coordinated treatment management

Egg Donation Treatment Packages

We have designed a variety of packages for infertility treatment using donor eggs, tailored to meet the diverse needs of international patients. All packages include consultation, full coordination, and continuous support in English (and in other languages upon request).

Egg Donation Package with 15 Fresh Oocytes

1. Initial Consultation and Assessment (in-person and online):

- In-person consultation with an IVF specialist
- Review of patient's medical records, previous ultrasounds and laboratory tests
- Precise treatment planning (cycle calendar)

2. Egg Donor Selection and Preparation (online and in-person):

- Introduction of thoroughly screened donors based on genetic testing, general health, and physical characteristics aligned with recipient preferences
- Blood type and genetic compatibility testing (if required)
- Synchronization of the donor and recipient cycles

3. Recipient Uterine Preparation (You):

- Hormonal tests and initial health assessment (online and in-person)
- Initiation of hormonal therapy for uterine preparation
- Multiple transvaginal ultrasound scans to monitor endometrial thickness
- Precise scheduling of embryo transfer

4. Ovarian Stimulation of the Donor:

- Administration of ovarian stimulation medications for the donor (by the clinic)
- Monitoring through ultrasound and hormonal tests to determine the exact timing of oocyte retrieval
- Oocyte retrieval under mild anesthesia

5. In Vitro Fertilization (IVF + ICSI):

- Intracytoplasmic sperm injection (ICSI) using partner's sperm
- Embryo culture in the laboratory up to day 5-3
- Embryo quality assessment
- Laser-assisted hatching to increase pregnancy chances
- Embryo cryopreservation

6. Embryo Transfer to the Uterus:

- Selection of the best-quality embryos for fresh transfer
- Transfer of one or two embryos under ultrasound guidance
- Transfer performed under mild anesthesia in a safe, specialized environment with ultrasound assistance (if required)
- Laser-assisted hatching for up to 15 embryos to enhance implantation potential
- Blastocyst culture for up to 4 embryos to improve pregnancy success rates

7. Post-Transfer Follow-Up:

- Prescription of supportive medications (progesterone, etc.)
- Pregnancy test (beta-hCG) approximately 14-12 days after transfer
- Consultation and continuation of treatment planning based on test results

Package Price: 4000 USD

Additional Optional Services (upon request):

- Hysteroscopy: 260 USD
- Medications: 900 USD

Advantages of the Package for International Patients:

- Use of high-quality donor oocytes to increase pregnancy success rates
- Option to select a donor based on physical preferences and genetic health
- Complete management of the process by an advanced IVF team with state-of-the-art equipment
- Feasible for international patients with short-term stays
- Suitable for women of advanced maternal age or with diminished ovarian reserve
- Possibility of online consultation prior to arrival, reducing both cost and time

Egg Donation Package with 10 Fresh Oocytes

1. Initial Consultation and Assessment (in-person and online):

- In-person consultation with an IVF specialist
- Review of patient's medical records, previous ultrasounds and laboratory tests
- Precise treatment planning (cycle calendar)

2. Egg Donor Selection and Preparation (online and in-person):

- Introduction of thoroughly screened donors based on genetic testing, general health, and physical characteristics aligned with recipient preferences
- Blood type and genetic compatibility testing (if required)
- Synchronization of the donor and recipient cycles

3. Recipient Uterine Preparation (You):

- Hormonal tests and initial health assessment (online and in-person)
- Initiation of hormonal therapy for uterine preparation
- Multiple transvaginal ultrasound scans to monitor endometrial thickness
- Precise scheduling of embryo transfer

4. Ovarian Stimulation of the Donor:

- Administration of ovarian stimulation medications for the donor (by the clinic)
- Monitoring through ultrasound and hormonal tests to determine the exact timing of oocyte retrieval
- Oocyte retrieval under mild anesthesia

5. In Vitro Fertilization (IVF + ICSI):

- Intracytoplasmic sperm injection (ICSI) using partner's sperm
- Embryo culture in the laboratory up to day 5-3
- Embryo quality assessment
- Laser-assisted hatching for up to 10 embryos to increase pregnancy chances
- Embryo cryopreservation

6. Embryo Transfer to the Uterus:

- Selection of the best-quality embryos for fresh transfer
- Transfer of one or two embryos under ultrasound guidance
- Transfer performed under mild anesthesia in a safe, specialized environment with ultrasound assistance (if required)
- Laser-assisted hatching for up to 15 embryos to enhance implantation potential
- Blastocyst culture for up to 4 embryos to improve pregnancy success rates

7. Post-Transfer Follow-Up:

- Prescription of supportive medications (progesterone, etc.)
- Pregnancy test (beta-hCG) approximately 14-12 days after transfer
- Consultation and continuation of treatment planning based on test results

Package Price: 3700 USD

Additional Optional Services (upon request):

- Hysteroscopy: 260 USD
- Medications: 600 USD

Egg Donation Package with 5 Frozen Oocytes

1. Initial Consultation and Assessment (in-person and online):

- In-person consultation with an IVF specialist
- Review of patient's medical records, previous ultrasounds and laboratory tests
- Precise treatment planning (cycle calendar)

2. Selection and Preparation of the Egg Donor (online and in-person):

- Introduction of thoroughly screened donors based on genetic testing, general health, and physical characteristics aligned with recipient preferences
- Blood type and genetic compatibility testing (if required)
- Synchronization of donor and recipient cycles

3. Ovarian Stimulation of the Donor:

- Administration of ovarian stimulation medications for the donor (by the clinic)
- Monitoring through ultrasound and hormonal tests to determine the exact timing of oocyte retrieval
- Oocyte retrieval under mild anesthesia

4. Oocyte Freezing:

- Selection of the best-quality oocytes for cryopreservation

5. Preparation of the Recipient's Uterus (You):

- Hormonal tests and initial health assessment (online and in-person)
- Initiation of hormonal therapy for uterine preparation
- Multiple transvaginal ultrasound scans to monitor endometrial thickness
- Precise scheduling of embryo transfer

6. In Vitro Fertilization (IVF + ICSI):

- Intracytoplasmic sperm injection (ICSI) with partner's sperm
- Embryo culture in the laboratory up to day 5-3
- Embryo quality assessment
- Laser-assisted hatching procedure to increase pregnancy chances

7. Post-Transfer Follow-Up:

- Prescription of supportive medications (progesterone, etc.)
- Pregnancy test (beta-hCG) approximately 14-12 days after transfer
- Consultation and continuation of treatment planning based on test results

Package Price: 3300 USD

Egg Donation Package with Genetic Testing (PGD/PGT-A)

Services included:

- All stages of obtaining donor eggs are carried out
- Either fresh or frozen oocytes, depending on the patient's needs
- Preimplantation genetic testing (PGD/PGT-A) for chromosomal health screening or detection of hereditary diseases
- Embryo biopsy and transfer after results (up to 4 embryos)
- Embryo biopsy for more than 4 embryos

Package Price: 4550 USD

Advantages of this Package:

- IVF performed with the highest quality standards and advanced equipment
- Reduced risk of unsuccessful pregnancy and genetic disorders

Donor Embryo Treatment Packages

Frozen Donor Embryo Package – Up to 4 Embryos

Suitable for:

couples who require treatment with donated embryos and are seeking a straightforward and effective process.

1. Initial Consultation and Assessment (in-person and online):

- In-person consultation with an IVF specialist
- Review of patient's medical records, previous ultrasounds and laboratory tests
- Precise treatment planning (cycle calendar)

2. Selection of Suitable Donor Embryo:

- Choice of embryo based on racial, physical, or blood group preferences (if available)
- Laboratory team evaluation of the health and quality of the donated embryo

3. Preparation of the Recipient's Uterus:

- Hormonal medications to optimize uterine
- Several transvaginal ultrasound scans to monitor endometrial thickness

4. Embryo Transfer (fresh or frozen):

- Timing based on endometrial readiness
- Transfer with/ without anesthesia under ultrasound guidance (According to the doctor's opinion)

5. Follow-Up and Pregnancy Test:

- Prescription of supportive medications after transfer
- Beta-hCG pregnancy test approximately 12 days post-transfer
- Consultation and follow-up based on results

Package Price: 6000 USD

Additional Optional Services (upon request):

- Hysteroscopy: 260 USD
- Medications: 600 USD

Advantages of this Package:

- Access to up to 4 frozen donor embryos
- Thawing of embryos either sequentially or all at once
- Embryo transfer in one or multiple cycles, based on physician's decision and uterine condition
- Uterine preparation in each cycle with estrogen and progesterone
- Medical consultation, ultrasound-guided transfer, and close follow-up in every cycle

Frozen Donor Embryo Package with PGD / PGT-A

Suitable for: couples with a history of miscarriage, advanced maternal age, or concerns about genetic disorders.

Steps:

- Access to frozen donor embryos with the option of genetic testing
- Embryo biopsy and submission to a genetics laboratory
- Screening for chromosomal abnormalities (PGT-A) or hereditary diseases (PGD)
- Refreezing of healthy embryos
- Uterine preparation and transfer of only genetically confirmed healthy embryos
- Pregnancy test and medical follow-up

Package Price: 6500 USD

Advantage:

- Reduced risk of miscarriage, increased likelihood of a healthy pregnancy, and greater genetic reassurance.

Frozen Embryo Transfer (FET) Package

Services included:

- Consultation with an infertility subspecialist
- Consultation with a urologist
- Transvaginal ultrasound
- Comprehensive hormonal testing for couples
- Pap smear with pathology assessment
- Uterine cavity depth measurement
- Sonography gown

Package Price: 1000 USD

Additional Services (upon request):

- Blastocyst culture for up to 4 embryos: 47 USD
- Laser-assisted hatching for up to 15 embryos: 16 USD

Intrauterine Insemination (IUI) Package

Services included:

- Consultation with an infertility subspecialist
- Consultation with a urologist
- Transvaginal ultrasound
- Comprehensive hormonal testing for both partners
- Male fertility tests: DNA fragmentation assessment (DFA), semen analysis (SA)
- Pap smear with pathology assessment
- Uterine cavity depth measurement
- Sonography gown
- Semen preparation

Package Price: 700 USD

Additional Optional Services (upon request):

- HCG injection: 87 USD
- Medications: 167 USD

Intrauterine Insemination (IUI) Package with Sex Selection (S.S)

Services included:

- Consultation with an infertility subspecialist
- Consultation with a urologist
- Transvaginal ultrasound
- Comprehensive hormonal testing for both partners
- Male fertility tests: DNA fragmentation assessment (DFA), semen analysis (SA)
- Pap smear with pathology assessment
- Uterine cavity depth measurement
- Sonography gown
- Semen preparation

Package Price: 800 USD

Additional Optional Services (upon request):

- HCG injection: 87 USD
- Medications: 167 USD

Additional Supportive Services Alongside Infertility Treatment Packages

Embryo Cryopreservation

- Freezing of high-quality embryos using vitrification technique
- Storage in nitrogen tanks under safe and standardized conditions
- Provision of an official contract for storage up to 3, 1, or 5 years
- Possibility of using frozen embryos for subsequent cycles or the second child

Fertility Nutrition Counseling

- Nutritional assessment for both partners
- Personalized diet plans to improve the quality of oocytes, sperm, and endometrium
- Specialized supplementation for fertility enhancement (e.g., CoQ10, Vitamin D, Folic Acid, etc.)
- Ongoing nutritional support throughout IVF treatment, pregnancy, and embryo freezing

Psychological Support & Fertility Counseling

- Individual or couple counseling sessions to reduce treatment-related stress and anxiety
- Support to strengthen resilience and motivation during unsuccessful cycles
- Specialized psychotherapy focusing on infertility and pregnancy
- Access to counselors fluent in Farsi, English, Arabic, or Russian
- Online counseling available
